1. CORPORATE INFORMATION

New Pacific Metals Corp. along with its subsidiaries (collectively, the “Company” or “New Pacific”) is a Canadian mining issuer engaged in exploring and developing mineral properties in Bolivia. The Company is in the stage of exploring and advancing the development of its mineral properties and has not yet determined if they contain economically recoverable Mineral Reserves. The underlying value and the recoverability of the amounts shown for mineral properties are entirely dependent upon the existence of recoverable Mineral Reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of the mineral properties, and future profitable production or proceeds from the disposition of the mineral property interests.

The Company is publicly listed on the Toronto Stock Exchange (“TSX”) under the symbol “NUAG” and on the NYSE American stock exchange (“NYSE-A”) under the symbol “NEWP”. The head office, registered address and records office of the Company are located at 1066 Hastings Street, Suite 1750, Vancouver, British Columbia, Canada, V6E 3X1.

(b) Basis of Consolidation

These unaudited condensed consolidated interim financial statements include the accounts of the Company and its wholly or partially owned subsidiaries.

Subsidiaries are consolidated from the date on which the Company obtains control up to the date of the disposition of control. Control is achieved when the Company has power over the subsidiary, is exposed or has rights to variable returns from its involvement with the subsidiary, and has the ability to use its power to affect its returns. For non-wholly-owned subsidiaries over which the Company has control, the net assets attributable to outside equity shareholders are presented as “non-controlling interests” in the equity section of the consolidated statements of financial position. Net income or loss for the period that is attributable to the non-controlling interests is calculated based on the ownership of the non-controlling interest shareholders in the subsidiary.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework and reviews the Company's policies on an ongoing basis.

(a) Fair Value

The Company classifies its fair value measurements within a fair value hierarchy, which reflects the significance of inputs used in making the measurements as defined in IFRS 13 – Fair Value Measurement ("IFRS 13").

Level 1 – Unadjusted quoted prices at the measurement date for identical assets or liabilities in active markets.

(Expressed in US dollars)

Level 2 – Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 – Unobservable inputs which are supported by little or no market activity.

The following table sets forth the Company's financial assets that are measured at fair value on a recurring basis by level within the fair value hierarchy as at September 30, 2022 and June 30, 2022 that are not otherwise disclosed. As required by IFRS 13, financial assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

There were no transfers into or out of Level 3 during the three months ended September 30, 2022.

(b) Liquidity Risk

The Company has a history of losses and no operating revenues from its operations. Liquidity risk is the risk that the Company will not be able to meet its short term business requirements. As at September 30, 2022, the Company had a working capital position of \$20,612,302 and sufficient cash resources to meet the Company's short-term financial liabilities and its planned exploration expenditures on various projects in Bolivia for, but not limited to, the next 12 months.

In the normal course of business, the Company enters into contracts that give rise to commitments for future minimum payments. The following summarizes the remaining contractual maturities of the Company's financial liabilities:

	September 30, 2022		June 30, 2022

(c) Foreign Exchange Risk

The Company is exposed to foreign exchange risk when it undertakes transactions and holds assets and liabilities denominated in foreign currencies other than its functional currencies. The functional currency of the head office, Canadian subsidiaries and all intermediate holding companies is CAD. The functional currency of all Bolivian subsidiaries is USD. The functional currency of the Chinese subsidiary is RMB. The Company currently does not engage in foreign exchange currency hedging. The Company's exposure to foreign exchange risk that could affect net income is summarized as follows:

Financial assets denominated in foreign currencies other than relevant functional currency	September 30, 2022	June 30, 2022
United States dollars	\$ 454,264	\$ 468,714
Bolivianos	772,091	886,188
Total	\$ 1,226,355	\$ 1,354,902

Financial liabilities denominated in foreign currencies other than relevant functional currency

Bolivianos	1,881,938	1,619,261
Total	\$ 1,881,938	\$ 1,619,261

As at September 30, 2022, with other variables unchanged, a 1% strengthening (weakening) of the USD against the CAD would have increased (decreased) net income by approximately \$4,500.

As at September 30, 2022, with other variables unchanged, a 1% strengthening (weakening) of the Bolivianos against the USD would have increased (decreased) net income by approximately \$11,000.

(d) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company holds a portion of cash in bank accounts that earn variable interest rates. Due to the short-term nature of these financial instruments, fluctuations in market rates do not have significant impact on the fair values of the financial instruments as of September 30, 2022. The Company, from time to time, also owns guaranteed investment certificates ("GICs") and bonds that earn interest payments at fixed rates to maturity. Fluctuation in market interest rates usually will have an impact on bond's fair value. An increase in market interest rates will generally reduce bond's fair value while a decrease in market interest rates will generally increase it. The Company monitors market interest rate fluctuations closely and adjusts the investment portfolio accordingly.

(e) Credit Risk

Credit risk is the risk of financial loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's exposure to credit risk is primarily associated with cash, bonds, and receivables. The carrying amount of financial assets included on the statement of financial position represents the maximum credit exposure.

New Pacific Metals Corp.

Notes to the Unaudited Condensed Consolidated Interim Financial Statements for the three months ended September 30, 2022 and 2021

(Expressed in US dollars)

The Company has deposits of cash that meet minimum requirements for quality and liquidity as stipulated by the Board. Management believes the risk of loss to be remote, as the majority of its cash are held with major financial institutions. Bonds by nature are exposed to more credit risk than cash. The Company manages its risk associated with bonds by only investing in large globally recognized corporations from diversified industries. As at September 30, 2022, the Company had a receivables balance of \$309,379 (June 30, 2022 - \$3,193,926). There were no material amounts in receivables which were past due on September 30, 2022 (June 30, 2022 - \$nil).

(f) Equity Price Risk

The Company holds certain marketable securities that will fluctuate in value as a result of trading on global financial markets. Based upon the Company's portfolio at September 30, 2022, a 10% increase (decrease) in the market price of the securities held, ignoring any foreign exchange effects would have resulted in an increase (decrease) to net income of approximately \$30,000.

11. CAPITAL MANAGEMENT

The objectives of the capital management policy are to safeguard the Company's ability to support exploration and operating requirements on an ongoing basis, continue the investment in high quality assets along with safeguarding the value of its mineral properties, and support any expansionary plans.

The capital of the Company consists of the items included in equity less cash and bonds. Risk and capital management are primarily the responsibility of the Company's corporate finance function and is monitored by the Board. The Company manages the capital structure and makes adjustments depending on economic conditions. Significant risks are monitored and actions are taken, when necessary, according to the Company's approved policies.

12. SEGMENTED INFORMATION

As at and for the three months ended September 30, 2022, the Company operates in four (as at and for the year ended June 30, 2022 – four) reportable operating segments, one being the corporate segment; the other three being the exploration and development segments based on the mineral properties in Bolivia. These reportable segments are components of the Company where separate financial information is available that is evaluated regularly by the Company's Chief Executive Officer, the chief operating decision maker ("CODM").

Effective July 1, 2022, the Company revised its reportable segments to reflect recent changes in the CODM's way of reviewing and assessing the Company's performance. As a result, the "Silver Sand", "Carangas", and "Silverstrike" mineral projects, which were previously included in the "Bolivia" segment, are separately presented. The previously presented "China" reportable segment is now being reported as part of the Corporate segment. The comparative information has been reclassified as a result of these changes.
