The following table sets forth the Company's financial assets that are measured at fair value on a recurring basis by level within the fair value hierarchy as at December 31, 2021 and June 30, 2021 that are not otherwise disclosed. As required by IFRS 13, financial assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

(b) Liquidity Risk

The Company has a history of losses and no operating revenues from its operations. Liquidity risk is the risk that the Company will not be able to meet its short term business requirements. As at December 31, 2021, the Company had a working capital position of \$38,099,556 and sufficient cash resources to meet the Company's short-term financial liabilities and its planned exploration expenditures on various projects in Bolivia for, but not limited to, the next 12 months.

In the normal course of business, the Company enters into contracts that give rise to commitments for future minimum payments. The following summarizes the remaining contractual maturities of the Company's financial liabilities:

| | December 31, 2021 | | | | | une 30, 2021 |
|--|-------------------------|-----------|----|-----------|----|--------------|
| | Due within a year Total | | | | | Total |

(c) Foreign Exchange Risk

The Company is exposed to foreign exchange risk when it undertakes transactions and holds assets and liabilities denominated in foreign currencies other than its functional currencies. The functional currency of the head office, Canadian subsidiaries and all intermediate holding companies is CAD. The functional

currency of all Bolivian subsidiaries is USD. The functional currency of the Chinese subsidiary is RMB. The Company currently does not engage in foreign exchange currency hedging. The Company's exposure to foreign exchange risk that could affect net income is summarized as follows:

| Financial assets denominated in foreign currencies other than relevant functional currency | | December 31, 2021 | June 30, 2021 |
|---|----|-------------------|------------------|
| United States dollars | \$ | 4,798,258 | \$ 11,079,194 |

As at December 31, 2021, with other variables unchanged, a 1% strengthening (weakening) of the Bolivianos against the USD would have increased (decreased) net income by approximately \$4,000.

(d) Interest Rate Risk

Total

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company holds a portion of cash in bank accounts that earn variable interest rates. Due to the short-term nature of these financial instruments, fluctuations in market rates do not have significant impact on the fair values of the financial instruments as of December 31, 2021. The Company, from time to time, also owns guaranteed investment certificates ("GICs") and bonds that earn interest payments at fixed rates to maturity. Fluctuation in market interest rates usually will have an impact on bond's fair value. An increase in market interest rates will generally reduce bond's fair value while a decrease in market interest rates will generally increase it. The Company monitors market interest rate fluctuations closely and adjusts the investment portfolio accordingly.

(e) Credit Risk

Credit risk is the risk of financial loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's exposure to credit risk is primarily associated with cash, bonds, and receivables. The carrying amount of financial assets included on the statement of financial position represents the maximum credit exposure.

The Company has deposits of cash that meet minimum requirements for quality and liquidity as stipulated by the Board. Management believes the risk of loss to be remote, as the majority of its cash are held with major financial institutions. Bonds by nature are exposed to more credit risk than cash. The Company manages its risk associated with bonds by only investing in large globally recognized corporations from diversified industries. As at December 31, 2021, the Company had a receivables balance of \$351,258 (June 30, 2021 - \$343,608). There were no material amounts in receivables which were past due on December 31, 2021 (June 30, 2021 - \$nil).

(Expressed in US dollars)

(f) Equity Price Risk

The Company holds certain marketable securities that will fluctuate in value as a result of trading on global financial markets. Based upon the Company's portfolio at December 31, 2021, a 10% increase (decrease) in the market price of the securities held, ignoring any foreign exchange effects would have resulted in an increase (decrease) to net income of approximately \$49,000.

13. CAPITAL MANAGEMENT

The objectives of the capital management policy are to safeguard the Company's ability to support exploration and operating requirements on an ongoing basis, continue the investment in high quality assets along with safeguarding the value of its mineral properties, and support any expansionary plans.

The capital of the Company consists of the items included in equity less cash and bonds. Risk and capital management are primarily the responsibility of the Company's corporate finance function and is monitored by the Board. The Company manages the capital structure and makes adjustments depending on economic conditions. Significant risks are monitored and actions are taken, when necessary, according to the Company's approved policies.

In addition, the current COVID-19 pandemic has caused significant disruption to global economic conditions which may adversely impact the Company's results.

As at and for the six months ended December 31, 2021, the Company operates in three (as at and for the year ended June 30, 2021 – three) reportable operating segments, one being the corporate segment; the other two being the exploration and development segments focused on safeguarding the value of its mineral properties in Bolivia and China. These reporting segments are components of the Company where separate financial information is available that is evaluated regularly by the Company's Chief Executive Officer, the chief operating decision maker ("CODM").
