

## JOB POSTING

### Exploration Geologist

#### Position Description:

We are seeking an Exploration Geologist to join our growing technical team. The ideal candidate will be someone who has practical field experience with precious metals exploration and drill program experience.

Reporting to the VP, Exploration, the candidate will work very closely with the technical team at the company's flagship Silver Sand property in Bolivia.

#### Primary Responsibilities:

- Work with the technical services team on the exploration drilling program including but not limited to technical reviews of mineral properties, monitoring drilling progress, core logging, up-to-date plotting and interpretation of drill sections, implementing and monitoring of relevant workflows and procedures (QA/QC etc.)
- Contribute to comprehensive exploration targets and plans including compilation of historical data, managing and analyzing site database, surface sampling and mapping, and historical core reviews
- Assist with the technical aspects of the Company's projects including but not limited to QA/QC for exploration activities, exploration program plan, supervision, and implementation, resource modelling and engineering, due diligence and data auditing, economic assessments etc.
- Contribute to geological interpretation of structures information and deposits including data compilation, integration and 3D modelling
- Manage standards and procedures when generating and analyzing data
- Prepare scheduled drilling reports and other reports as required to highlight key progress
- Perform other duties as assigned

#### Requirements:

- Bachelor of Science degree in Geology
- Minimum 5 years of progressive experience in a similar role with significant exposure to operations within the mining industry
- Registered Professional Geologist in Canada or equivalent considered a strong asset
- Practical field experience with exploration and evaluation techniques
- Knowledge of mining software package, i.e. Micromine, Leadfrog, ArcView/MapInfo, or AutoCAD
- Must be dynamic, self-motivated with demonstrated leadership and managerial experience
- Strong organizational and communication skills
- Highly adaptable and flexible to ever changing high-demand work environment including willingness to spend time in the field

#### Additional Desired Qualifications:

- Spanish fluency and experience working in Latin America

**Job Demands/Physical Requirements:**

- Travels to other destinations for potential projects may be required
- Our Silver Sand project is located in Potosi Department, Bolivia at high elevation.
